

Grant Funding Conversion Diagnostic

Product Lock Specification

Version: REPORT_FRAMEWORK_LOCK_V1_2026_07_06. This document resolves the alignment conflict between the report template, assessment workbook, LimeSurvey package and deployable framework. It is the source of truth for developers, assessors and report automation. Any future changes must update the lock workbook first.

1. Alignment decision

The attachments were not fully aligned. The client report template and the assessment workbook use the report-version framework: 12 client-facing variables, 24 assessment areas/drivers, 121 metrics, and weights totalling 100%. The LimeSurvey package and deployable framework used a shorter alternate naming system and different weights. This lock keeps the report version as canonical because the paid product must return the attached report faithfully.

Source	Status	Decision
Client report template	Aligned master	Preserve as the master report structure and client-facing naming system.
Assessment workbook	Mostly aligned	Use its report-version driver engine and scoring map as the basis for scoring.
LimeSurvey package	Not fully aligned	Superseded by REPORT_FRAMEWORK_LOCKED LSS with report-version group names, codes and metadata.
Deployable framework doc	Not aligned to report version	Superseded by this product lock for variable names, weights, driver names and report logic.

2. Canonical 12-variable report framework

Code	Client-facing variable	Weight	Metrics	Barrier grouping
R01	Context, legal route & compliance	15%	17	B1 - Context, Eligibility & Compliance
R02	Funder intelligence & timing	6%	9	B2 - Funding Intelligence & System Discipline
R03	Fundraising systems & go/no-go	4%	9	B2 - Funding Intelligence & System Discipline
R04	Funder fit & work design	7%	11	B3 - Fit, Competitiveness & Access
R05	Competitive positioning, appeal & ROI	5%	8	B3 - Fit, Competitiveness & Access
R06	Network position & access routes	5%	9	B3 - Fit, Competitiveness & Access
R07	Relationship, leadership & visibility	8%	8	B3 - Fit, Competitiveness & Access
R08	Application quality & storytelling	4%	6	B4 - Proposal, Proof, Trust & Ethics
R09	Coherence, evidence & social proof	6%	9	B4 - Proposal, Proof, Trust & Ethics
R10	Safeguarding & protected proof	5%	8	B4 - Proposal, Proof, Trust & Ethics
R11	Due diligence, finance & risk	28%	22	B5 - Due Diligence, Operations & Financial Viability
R12	Grant management & sustainability	7%	5	B6 - Post-Award, Renewal & Adaptability

3. Locked 24 assessment areas

These 24 assessment areas sit below the 12 report variables. They are internal/scoring-facing labels and may appear in Full Report metric tables or audit outputs, but the main client narrative should lead with the 12 report variables.

Driver	Assessment area	Variable	Metrics	Primary stage
D01	Operating context and safety	R01 Context, legal route & compliance	13	6 Due Diligence
D02	Legal and receiving route	R01 Context, legal route & compliance	4	2 Eligibility Checked; 6 Due Diligence
D03	Funder market intelligence	R02 Funder intelligence & timing	5	1 Opportunity Found
D04	Funder timing and access gates	R02 Funder intelligence & timing	4	1 Opportunity Found
D05	Pipeline tracking and ownership	R03 Fundraising systems & go/no-go	2	3 Application Submitted
D06	Go/no-go discipline and repair loop	R03 Fundraising systems & go/no-go	7	3 Application Submitted; 4 Proposal Review
D07	Mandate and eligibility fit	R04 Funder fit & work design	9	2 Eligibility Checked; 4 Proposal Review
D08	Work design and grant-size fit	R04 Funder fit & work design	2	2 Eligibility Checked; 4 Proposal Review
D09	Competitive positioning	R05 Competitive positioning, appeal & ROI	6	4 Proposal Review
D10	Value case and ROI	R05 Competitive positioning, appeal & ROI	2	4 Proposal Review
D11	Access routes	R06 Network position & access routes	1	1 Opportunity Found; 5 Conversation / Clarification
D12	Referrals and intermediaries	R06 Network position & access routes	8	1 Opportunity Found; 5 Conversation / Clarification
D13	Relationship management	R07 Relationship, leadership & visibility	7	5 Conversation / Clarification; 8 Award / Renewal
D14	Leadership visibility	R07 Relationship, leadership & visibility	1	5 Conversation / Clarification; 8 Award / Renewal
D15	Application clarity and storytelling	R08 Application quality & storytelling	5	3 Application Submitted; 4 Proposal Review
D16	Proposal coherence and budget/story alignment	R08 Application quality & storytelling	1	3 Application Submitted; 4 Proposal Review
D17	Evidence readiness	R09 Coherence, evidence & social proof	8	4 Proposal Review; 6 Due Diligence
D18	Social proof and references	R09 Coherence, evidence & social proof	1	6 Due Diligence
D19	Safeguarding and ethics	R10 Safeguarding & protected proof	6	6 Due Diligence
D20	Protected evidence protocol	R10 Safeguarding & protected proof	2	6 Due Diligence
D21	Governance and controls	R11 Due diligence, finance & risk	20	6 Due Diligence; 7 Budget / Contract
D22	Finance and risk readiness	R11 Due diligence, finance & risk	2	6 Due Diligence; 7 Budget / Contract
D23	Grant management and renewal	R12 Grant management & sustainability	4	8 Award / Renewal
D24	Sustainability and adaptive capacity	R12 Grant management & sustainability	1	7 Budget / Contract; 8 Award / Renewal

4. Stage score formulas

Stage	Name	Locked formula	Gate question
1	Opportunity Found	AVG(R02, R06)	Do we know the funder early enough and have a route to reach them?
2	Eligibility Checked	AVG(R01, R04)	Can we pass context, legal route, eligibility and fit checks?
3	Application Submitted	AVG(R03, R08)	Are we applying with disciplined effort and a clear application?
4	Proposal Review	WEIGHTEDAVG(R05 35%, R08 25%, R09 25%, R04 15%)	Does the funder understand, trust and prioritise the ask?
5	Conversation / Clarification	WEIGHTEDAVG(R07 60%, R06 40%)	Can the organisation move into human engagement?
6	Due Diligence	AVG(R01, R09, R10, R11)	Do documents, governance, safeguarding, finance and proof survive verification?
7	Budget / Contract	WEIGHTEDAVG(R11 70%, R12 30%)	Are the ask, terms, costs and delivery promises realistic?
8	Award / Renewal	AVG(R07, R12)	Can the relationship, reporting and sustainability position support continued funding?

5. Non-negotiable automation gates

Gate	Locked rule
Framework totals	Variable weights must total 100%; metric counts must total 121; every variable must have exactly two assessment areas.
Survey decoding	The engine must decode LimeSurvey question codes, SGQA-style fields, matrix subquestions and multi-select Y/blank exports.
No silent defaults	Never generate a client-facing report from default 50% variables or zero scored survey signals.

Report fidelity	The paid Full Report must populate the Word template; HTML is preview only.
Evidence safety	Protected evidence must not appear in the Free Executive Report and must trigger safe proof/redaction guidance.
Route logic	Use now / verify / repair / pause / avoid / unsafe route selections must feed route pages and manual review.
Font and PDF QA	PDF conversion must verify Verdana availability and inspect output for cut-off tables, invisible text and broken page numbers.

6. Deliverables in this lock package

This package includes the product lock workbook, aligned framework CSVs, a report-framework-locked LimeSurvey LSS, LSS field alignment audit, import notes and this specification. Developers must build from these files rather than guessing from older documents.
